Project Design Phase-I
Problem – Solution Fit Template

Date	16 February 2026
Project Name	**Visualization Tool for Electric Vehicle Charge and Range Analysis**
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- **Solve the complex problem of "range anxiety" by providing an intuitive, visual dashboard that fits the trip-planning and decision-making state of EV drivers and buyers.**
- **Increase the adoption of your Tableau solution by tapping into the existing behavior of drivers who already search for specific data points like vehicle efficiency, top speeds, and local charging station availability.**
- **Sharpen your project's value proposition by directly addressing the triggers users face (like low battery anxiety or buying hesitation) with clear, centralized data visualization.**
- **Build trust with your users by solving their most frequent and costly annoyances: struggling to find compatible fast-chargers (like DC-001 or CCS) in their specific region before they run out of power.**
- **Understand the currently fragmented EV data landscape (spanning multiple brands, prices, and scattered charging networks) to centralize and improve the information flow for your target group.**

EV Market Strategy Canvas

Enhanced with Gemini AI Intelligence

Define Segment

1. CUSTOMER SEGMENT(S) [CS]

- Current EV owners in India & globally,
- Potential EV buyers researching prices, efficiency, and range.
- Commercial EV fleet managers optimizing routing.

2. JOBS-TO-BE-DONE / PROBLEMS [J&P]

- Planning long-distance travel without running out of battery.
- Finding compatible, fast-charging stations nearby (CCS, CHADEMO)
- Comparing EV brands on price, speed, & efficiency (Wh/Km).

5. AVAILABLE SOLUTIONS [AS]

- Proprietary OEM apps (Tesla app, etc.)
- PlugShare and similar apps.
- Standard GPS like Google Maps.

Deep Dive

3. TRIGGERS [TR]

- Battery under 20%.
- Planning a road trip.
- Range anxiety about EVs.

9. PROBLEM ROOT CAUSE [RC]

- Fragmented charging networks
- No unified dashboard.

7. BEHAVIOUR [BE]

- Calculating range in head.
- Using multiple apps.
- Seeking advice online.

Growth

4. EMOTIONS: BEFORE / AFTER [EM]

- **Before:** Anxious & stranded.
- **After:** Confident & informed.

10. YOUR SOLUTION [SL]

- Interactive Tableau Dashboard.
- EV models mapped by efficiency & price.
- Charging stations mapped by region.

8. CHANNELS [CH]

- **8.1 ONLINE:** EV forums, YouTube, App stores.
- **8.2 OFFLINE:** Dealers, Charging stations.

Channels
