Ideation Phase
Define the Problem Statements

Date	31 January 2026
Project Name	**Visualization Tool for Electric Vehicle Charge and Range Analysis**
Maximum Marks	2 Marks

Customer Problem Statement Template:

The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face . Here are two problem statements tailored for your Tableau EV dashboard project to fill out the table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	**a new electric vehicle owner**	**confidently run daily errands and commute without range anxiety**	**I constantly worry if my current battery charge is enough to get me to my destinations and back**	**I don't have an intuitive visual tool that maps out my reachable driving radius and highlights nearby available chargers**	**anxious and hesitant to take spontaneous trips**
PS-2	**an EV driver planning a long-distance road trip**	**map out the most efficient travel route to my destination**	**it takes a long time to manually search for compatible and available fast**	**existing navigation tools lack integrated, filterable data on charging station network types, charging**	**frustrated and overwhelmed by the trip-planning process**

			charger s along the way	**speeds, and real-time station availability**
